

Meet

Dian Booth

Author, Master Sound
and Colour Healer

International Performer
of Transformational
Healing Concerts

Teacher of
Transformational
Healing

Sound, Colour and
Movement are the essential
elements in the process of
Creation, as understood
by all major Indigenous
cultures. They are
fundamental to all of Dian's
teaching and performing.

What makes Dian Booth unique and a success?

Here are some accolades from Healing
concerts, just to name a few...

"The most beautiful music I have ever heard!"

"Absolutely fantastic!"

"I felt I was transported back to the time of
Creation."

"A most extraordinary experience."

"Your music is so special, it makes us cry, so we
know at what depth the healing is happening."

The greatest accolade is:

*"We, the Native American people,
have known for many thousands
of years that at this time there
was to be a new form of healing
to come for Earth. We knew it
was important but didn't have any
information about it. So we've
always referred to it as The Healing
with No Name. Dian, you are the
person who has brought it."*

**Bruce Hardwick, Elder,
Ojibwe Tribe, USA**

Transformational Healing

These are some of Dian's workshops and teachings that have taken her around the world.

- The Satipatthana Healing Breath
- The Elements of Earth, Air, Fire, Water
- Sacred Geometry
- Opening to Love and Truth
- The "Na-Ku-Ra" Egyptian Healing Instrument
- Initiation and Celebration
- Sound, Colour and Movement

Concerts

Much of the music created by Dian is inspired by healing sounds from the times of Atlantis and Lemuria. Music during each performance is created spontaneously

Dian is a violin virtuoso and she surrounds herself with talented and skillful healer/musicians playing a wide range of instruments.

Performing around the world, Dian offers spiritual healing at the deepest level based on her knowledge of sound, colour and movement as essential healing vehicles. They can transport the listener back to the process of creation, where soul healing is at its deepest.

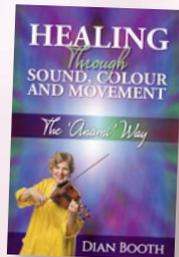

Concerts, often at yoga centres, always feature one of the world's oldest wind instruments, the didgeridoo. Other sacred healing instruments from other cultures are regularly included, which provides a cross-cultural healing experience.

Book and CDs

Dian has just published her first book: Healing Through Sound, Colour and Movement, The 'Anami' Way.

Dian has numerous CDs each with a different purpose. Titles include:

- Aspects of Love
- Joyful Mind, Tender Heart
- Archipelago
- Soul Sanctuary
- The Goddess Walk

The training often accesses sounds from Aboriginal Australia, Egypt, Atlantis, and Lemuria. While not teaching a 'system of healing', Dian offers all of the above as connection to the various vehicles of healing.

"Dian Booth is not just working with Sound, she is weaving the living sound of Creation into her work. She is helping to awaken the healing and transforming frequencies of the Soul. In these times of change, the sound of creation is a vital doorway to understanding."

Tareth, Glastonbury, UK

This way of teaching has been described by those with spiritual wisdom as, "The Healing with No Name" or "The 'Anami' Way". Anami, a Sanskrit word meaning Nameless Healing, describes the highest level of teaching in the Kant Indian Spiritual System.

"Treat yourself to one of the truest healers of our age! Dian's unique skills to play spontaneous, angel-like music can only be described as a divine talent. This, combined with her knowledge of the Earth, the human body and the subconscious mind's ability to heal, put Dian in a category of her own. Her music provides a transformational journey into your inner paradise, into the true self where the inner healing belongs."

Alan Gutierrez, 'Emerald Energies' and 'Sapphire Songs', USA

You are invited to include Dian Booth in your portfolio of artists for concerts or workshops.
